## MRMODA® Redefining Guitar Protection

Martin Ritter, renowned globally for his radical, fashionable and durable musical instrument bag creations, will launch his Super High-End Gig Bag range MRMODA® in January 2017 redefining guitar gig bag design and instrument protection.

Benefitting from a super sleek, minimalist look, incorporating a stowaway professional backpack system and waist strap, the MRMODA® range will offer a detachable MP3/cell phone pouch, reflective safety strips and bindings, all round super-jumbo piping, along with a huge amount of storage space. Other features are an anti-wear base and headstock protector panel with added diamond bumpers, polyester bridge and headstock protectors, integrated neck support, polyester end-pin protection, large neck positioned pedal pouch, large A4 music pouch, and additional front accessory pocket with a high density padded laptop pouch.

Made from luggage grade 1680D Polyester, the MRMODA® range is offered in Jet Black, and features 40mm ultra thick padding with ABS inserts throughout and soft non-scratch lining.
